

Why Choose Industrial Vacuum Over Our Competitors

Innovative Design Creates a Reliable and Safer Vacuum System

Industrial Vacuum vs. The Competitor

VS

1

BELT TENSION SYSTEM

INDUSTRIAL VACUUM

- Comes with engine guide.
- Superior design into the channel as a guide.

2

BLOWER PROTECTION FILTER

- Removal process:
- Time saving
 - No tools needed
 - No heavy 6" hose to remove

3

BLOWER SHIELD

Used on the 624 blower to increase Mercury inches.

4

BLOWER BELT GUARD

Can be replaced without removing complete belt guard:

- Quicker
- Safer

COMPETITOR VACUUM

All thread bolt used as belt tensioner with grooved cut.

- Tools are required to remove bolts.
- 6" hose needs to be removed.

NOT OFFERED

Heavy belt guard needs to be removed to replace the belts.

5

CONTROLS

INDUSTRIAL VACUUM

Engine & vacuum controls single point.

- Tongue gussets heavier steel vertical welds.
- Double tube assembly for strength.

Always on control side.

Heavy duty box included.

COMPETITOR VACUUM

- Engine controls in engine compartment.
- Vacuum controls located on the tower.

Additional lighter plate welded to tongue area.

UNKNOWN

Light duty box option.

9

HOSE ASSIST RING

INDUSTRIAL VACUUM

Used for leveraging stubborn hoses.

8" x 8" square pad support.

- Heavy duty.
- Mounted inside tongue fame.

Cleaner design with guide plate.

COMPETITOR VACUUM

NOT OFFERED

Smaller 4" disc.

Lighter, unprotected.

Welded all tread bolt & groove cut into channel iron as a guide.

13

FUEL TANK

INDUSTRIAL VACUUM

- Filler tube on the driver side.
- Easy access on the jobsite.

- Faster and safer filter change.
- Lid can be raised without removing the hopper hose.
- Blast pipes can be raised on some units as a single unit without tools.

Integrated hopper safety supports:

- Less weight
- Safety
- Saves money – fewer safety pins to replace
- Difficult to install if you are under 6' tall

- Lower center of gravity makes it less likely to rollover.
- 1-2" wider and up to 4' lower in height.

COMPETITOR VACUUM

May be located on the passenger side.

- Removing lid:
- Remove hose to allow lid to rotate for access to the filters
 - Possible back strain and fall hazard

Heavy support tubes.

NOT OFFERED
