

32 Ton Storage Hoppers

Rapid-Prep manufactures abrasive storage hoppers for short and tall abrasive blast pots.

An abrasive hopper provides a storage and loading solution for bulk abrasive. A hopper not only allows you to take advantage of lower abrasive cost on bulk media, but improves the speed and ease of loading process.

- **Reduced Cost**
 - Bulk abrasives are more economical than bagged product. Additional savings result from reduced material handling, reduced manpower, and no requirement for a mechanical lifting device.
- **Enhanced Safety**
 - Standard features include a caged ladder and chain guardrail system with kick plates providing three additional safeguards.

Features	Benefits
725 cu. ft. Capacity	Lower abrasive cost due to utilizing bulk material
Caged Ladder included as a standard feature : Rapid Prep Exclusive Roof Guardrail System with kick plates included as a standard feature: Rapid-Prep Exclusive	The location of the vent port is easily accessible for clean out & inspection purposes
18.5 ft. Clearance – RP Exclusive	Can be used with most all bulk pots
Quicker than loading with bulk bags	No more struggling with lifting bulk bags into position
1 Large 8" discharge chute. Lower fill level indicator	Fill blast pots faster than with standard 6" chute
Rain Guard Around Hopper Spout	Rain Guards shed water, preventing it from funneling into the pot & hopper

Tall Hopper Dimensions: Overall Height: 34' Includes Safety Railing; Overall Width: 8'; Clearance Height 18' 10", Weight: 11,500 lbs
